

Dear FCC,I oppose the proposed rule. I believe it is ill defined, it would be hard to implement, and unfairly impact small business owners. I believe most business would stop selling radio equipment rather than implement any tracking system that would have to deal with thousands, if not millions of transactions per year (for example, Circuit City annual sales of FRS radios). Additionally, I believe the proposed law enforcement example provided would be outside the domain of local law enforcement and is possibly an illegal Terry stop.

Thanks,  
Bret A. Boggs
